

Energy SAVINGS

WITHOUT CURTAIN COVERINGS YOU WILL FACE UP TO 40% HEAT LOSS AND UP TO 50% HEAT GAIN.

Insulation provides a barrier to heat flow into and out of your home. A well insulated home is warmer in winter and up to 7 degrees cooler in summer and can save as much as \$300 per year energy costs.

HEAT LOSS THROUGH VARIOUS GLASS TREATMENTS

- Unprotected single glazing 100%
- Vertical or Venetian blinds 100%
- Unlined drapes or Holland blinds, no pelmet 92%
- Heavy lined drapes, no pelmet 87%
- Unlined drapes or Holland blinds, pelmets 79%
- Double glazing 69%
- Heavy lined drapes, pelmet 63%
- Double glazing with low-e coating 57%
- 25mm Polystyrene shutters, good airseal 50%
- Double glazing, heavy drapes, pelmets 47%

Local and State governments are now recognising the benefits of Curtains in the home and are recommending the installation of curtains in new homes in order to acquire the correct 'energy rating'
